### GOING TO ONTARIO AND QUEBEC.

A party that has been in the Northwest for some time, left last night for Chicago, where they will take the cars to Central R. R. for London, Toronto and Montreal.

The Michigan Central route was selected because it is known to be the best by far from Chicago to Canadian points.

The line runs express trains daily from Chicago to Ottawa, three on Sundays; and two others, the 2:30 p.m. and 5:35 p.m. trains, are transported by Dining Cars. A "Palace Sleeping Car" runs from Chicago on the 5:30 p.m. to Ottawa, and the other trains have through cars to Canadian points.

Through tickets are on sale to all these points, and baggage will be checked through.

SATURDAY, JUNE 16, 1883.

**EDITORIAL NOTES.**

Our fruitful contemporary in a sudden fit of temper says that Mr. Woodworth has gone into the legislature to make all the money he can out of it by jobbery or otherwise. This is the excellent formality that reads pious but Pecksniffian sermons to its readers three or four times a week. No doubt there is some difference between charging a person with an intent and of accusing the same person of having wilfully, maliciously and feloniously committed an actual crime. The only thing that surprises us is our contemporary's forbearance. Had it charged the member for Brandon with the offence though wholly untrue would be consistent with our contemporary's general recklessness of assertion, but as it charges him merely with an attempt at political burglary it should at least support so serious an accusation with something more than the cheap assertion of the professional prevaricator who values the reputation of an opponent as little as he appears to estimate the goodness of truth and the virtues of the commandments.

**WINNIPEG NOTES.**

A lady named Simpson was deprived of her pocket book containing \$15 the other night at the Princess Opera House. Beware of pickpockets.

A Collector of Customs has been appointed for Neepawa, near Port Arthur. Mr. L. H. McDonald, who was formerly landing waiter at Clifton, Ont., has been transferred to Neepawa.

Word has reached the city from Port Arthur that a well known native named Abraham Marshall fell from his bicycle during its ascent of the Quebec Hill, Macdonald Island, on Tuesday, June 7, and was killed.

James G. Reed, G. J. Brown, was on board Thursday evening at the dry dock chariot to give steam to the machinery who took up his residence in the building and calling upon him to attend a general meeting of the owners to consider the proposed egg charter. Mr. Anderson, however, made a bid for the credit by putting in an offer of \$1000 to improve it.

wanted for some months past, was likely to come down much more quickly than it went up.

**Church Services**

Rev. Mr. Bridgeman will occupy the pulpit of the Methodist church tomorrow, both morning and evening. Young people's class in the morning at 9:30. Sabbath school at 2:30 p.m. To all these services strangers are cordially welcome.

WAGER \$500.00

## To Whom it May Concern.

During the thunderstorm in August, 1882, the County of Middlesex, Ontario, alone suffered to the extent of from \$50,000 to \$85,000 in the destruction of dwellings, barns and out-buildings. Not one of the structures consumed was furnished with rods from the Globe Lightning Rod Company of London, although there are thousands and thousands of feet of our rods erected upon the farm houses and barns in Middlesex Co., and over 10,000 being erected within the city limits alone during the past two years. The statements of a few acres to the contrary notwithstanding, The Globe Company, in order to show their confidence in the goods manufactured and sold by them, are prepared to place the sum of \$500.00 in the hands of His Worship the Mayor (or any other responsible citizen in London,) against a similar amount of deposited by any person or persons who can prove, that a building provided with suitable rods from the Globe Company has been struck during either of the recent thunderstorms which have visited Western Ontario. The money to be divided between the different charitable institutions in Brandon. Orders by mail promptly attended to.

### Thrilling Courtship.

"Don't contradict," said the stern parent. "You have been holding secret interviews with Charles Mousterrat de Montmorency." He was a proud but fashionable tailor, and not to be trifled with. "How did you find it out?" sobbed the daughter "you never saw us." "No, I never saw you," he returned indignantly, but my faithful Bruno came running to me this evening with a mouthful of cloth. I recognized the pattern at once. I cut the piece to make a pair of pants for young Montmorency two months ago, and he hasn't paid for them yet." All she answered was: "Father dear, it's too awfully too too," and she fell like a little faded flower at his feet.

### Dangers of Childhood.

Childhood is the period during which the foundations of the physical structure are laid. It ends, at the age of about 15, with the completion of the permanent teeth. It is characterized by almost absolute dependence on the parents, and therefore the responsibility rests upon them whether the foundations of the superstructure shall be good or bad; and, indeed, whether there shall be any superstructure.

The fact that one-half of all who are born die within this period, while multitudes of adults find, when it is too late, fatal defects in the very ground-work of their constitutions, is a fearful witness against the competency of most parents for the care of children. What father would employ a hand that let one-half of all his calves, colts and lambs die?

In the matter of food, if milk fails the mother, how few mothers know what to give the child! How few know that many of the compounds sold as "infant's food" contain almost no food whatever! and that cow's milk, harmful when taken alone, is generally safe with a certain proportion of lime-water! How few mothers know that a good wet-nurse would save almost any babe nursed by hand, and that is nearly as certain to die of cholera infantum! How many know that too-protracted nursing will result in "rickets"? That over-feeding all through childhood is a prolific source of disease? and that, in case of most bowel complaints, a spare diet for a few days is better than all medicine?

In our climate, where the mercury ranges through 140 deg., and often varies between the extremes suddenly and violently, how little do mothers realize the importance of aiding nature, with clothing and food, so that the internal temperature is held steadily at 98 deg. Do you know that a change of half a dozen degrees of the internal temperature, either way, is almost sure death?

The great mortality of children in summer is due mainly to heat. An abundance of woolen clothing alone can guard against the effects of the violent changes in the climate of autumn, and winter, and spring.

How few are aware that the infectious diseases which so ravage childhood are caused by careless exposure to the contagion, or, if aware, act accordingly — *Youth's Companion*.
